

Ariel Green

# The Technology Performance Insurer

## Experts Powering Our Clean Energy Future

Ariel Green provides Technology Performance Insurance (TPI) for the clean energy industry, deploying capital through customized long-term and non-cancellable risk management solutions. As a division of Ariel Re (a Lloyd's of London syndicate) our team is supported by the world's leading insurance and reinsurance marketplace.

## The Ariel Green Way

### Expertise

We bring **Deep Expertise** in clean energy technologies, insurance and project finance.

### Collaboration

We work **Collaboratively** with you to understand the unique technical and financing challenges of your project.

### Custom Solutions

The result is a **Customized** insurance solution that meets the specific needs of project stakeholders.

## Technologies We Insure

Solar

Energy Storage

Bioconversion & Waste-to-Energy

Hydrogen & Fuel Cells

Other Technologies

# Providing Value For Clean Energy Stakeholders

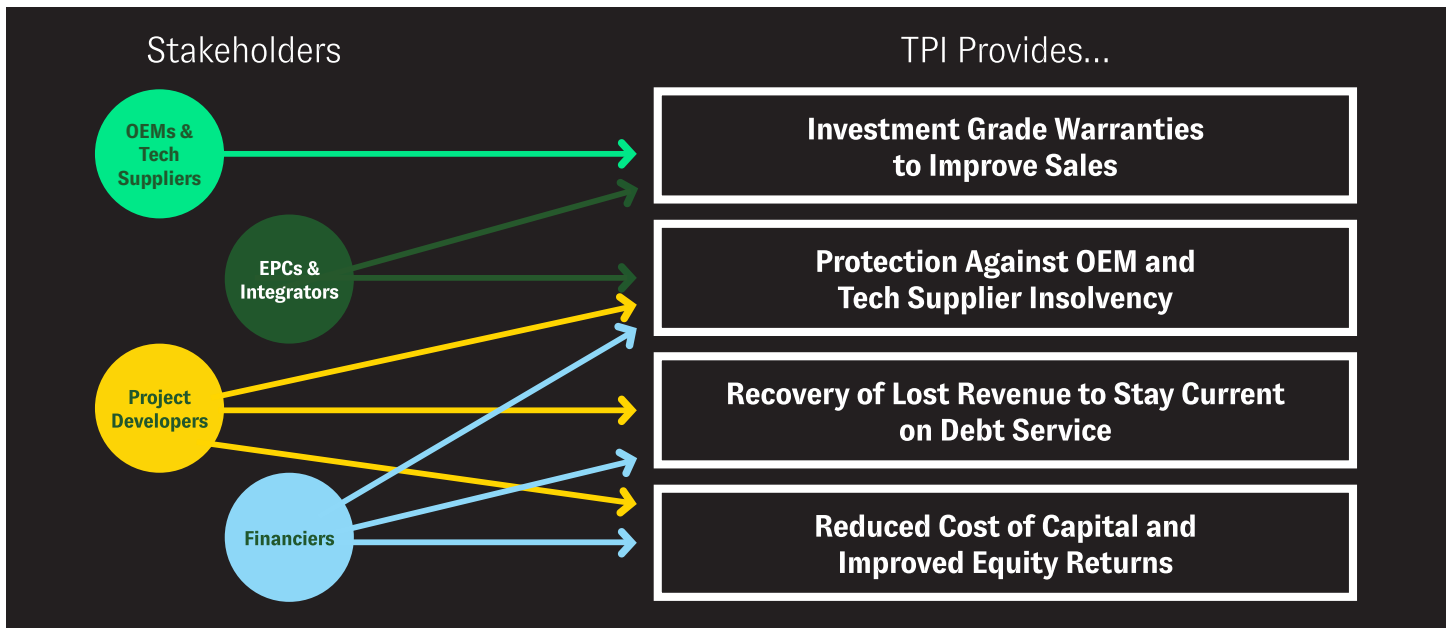

## RISK MANAGEMENT PRODUCTS

**Operational Cover**—Insures the output up to an agreed attachment level that keeps debt service and other critical costs covered while corrective action is taken to return the project to profitability.

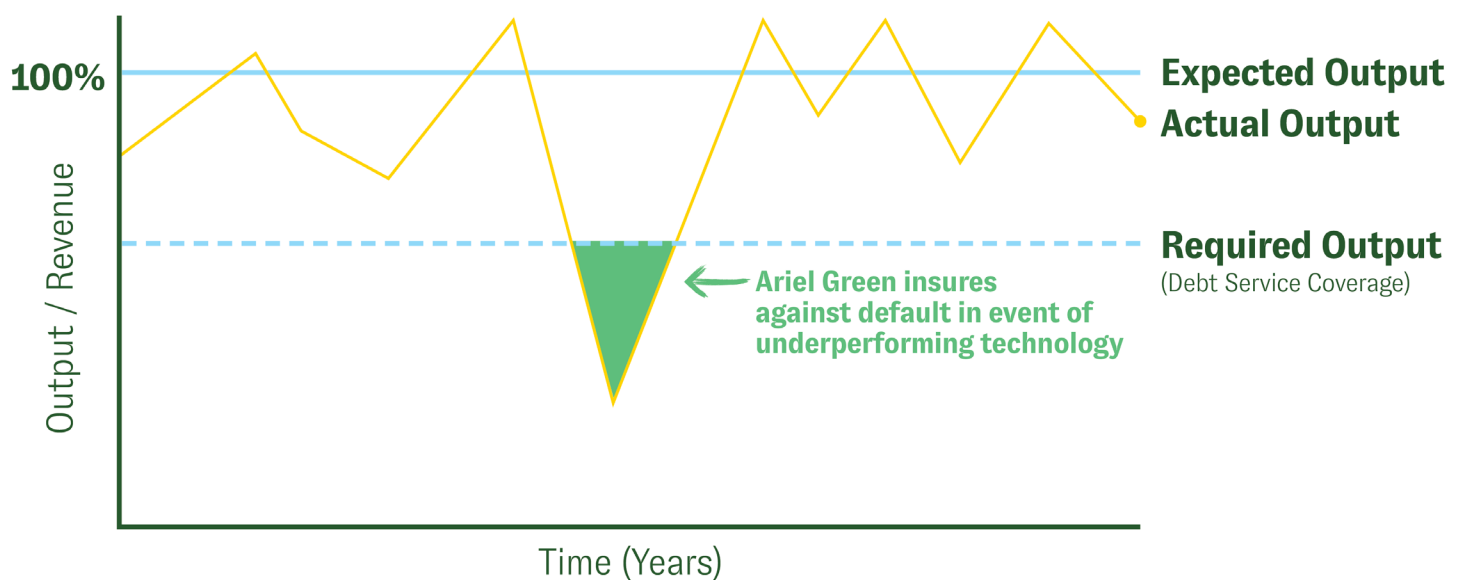

**Startup Repair Cover**—Provides confidence that funding is available to enable projects to reach name plate capacity and begin commercial operations.

**Warranty Backstop**—Upgrades technology performance guarantees to investment grade, thereby enabling risk-averse equity investors and debt holders to participate in clean energy projects.

**Custom Solutions**—All Ariel Green insurance products are bespoke, prepared specifically to enable clean energy projects to advance to fruition.
